Examiner Shallenberger,

In response to part of the Office action of August 7, 2007, please amend the above-identified application as follows:

One replacement drawing sheet (1/2) and one new drawing sheet (2/2) for the above application are enclosed, corrected\* as necessary. Please substitute (1/2) for the corresponding original sheet (1/1) on file and add the new sheet (2/2) to the same file.

\*The corrections (1/2) to the original drawing (1/1) were made to improve readability and reproducibility, e.g. increased all line thicknesses by a 0.5 pt.; removed labels from within figures (1A, 1B, 2A, 2B, 2C, 3A, 3B, and 3C); reference numeral lead lines that refer to phantom parts (i.e. not part of the invention) were changed to 0.5 pt. dashed lines; and Fig. 4D shading was removed to improve reproducibility.

The new sheet (2/2) better illustrates two possible forms of the invention than the preceding schematic block diagrams. The pictorial representation Fig. 6A of a USB Jacklamp and 6B of a Firewire (IEEE 1394) Jacklamp, aid in visualizing the invention and how it might be used on the end of a compatible cable.

Very respectfully,

Applicant: William W. Truxes III
